RE: Ms. Wendy Gesler, Gesler Programming Services (GPS, get it? Like helping you find your way!)

To whom it may concern:

I have been involved in this industry a long time. I have been a CEDIA Education Content Dean, am overseeing the re-write of several 400 level Project Management and Technician Courses, and consulting on the re-write of the CEDIA Level 1 and 2 Installer Exam Re-writes. I have worked with some of the most famous and prestigious companies in the custom electronics industry, such as Artistic Systems of Telluride, Colorado and Sedona/Scottsdale AZ, and currently Paragon Technology Group in Aspen/Vail/Steamboat Springs, CO.

Although the latter is no longer a large scale AMX dealer, and we have dedicated programmers on staff, I can truly say that Wendy is in the top 3 programmers I have EVER worked with, anywhere in the country, and by far the best AMX programmer.

Starting with her file structure and work ethic, and carrying all the way down to her technical troubleshooting techniques (she WILL become another technician on your job site if the mood strikes her!) and her ability to seamlessly converse with both installation technicians and clients, she exhibits a lot of qualities that very few people at her technical and mental level do; the ability to simply and seamlessly converse with both technicians and clients, while programming the most complex systems around.

Have you ever heard the words, "OK, Done, what else can I do?" You will hear these from Wendy. Regardless of whether you're "100% ready" for her (and here's a clue, YOU'RE NOT!) to being, "we just have a few amp zones to land, one RS-232 link to troubleshoot, and a projector to calibrate," she will bury you and your technicians in speed, accuracy and finality.

Wendy will be ready, and is more than able, when you say go.

I have never in my years, prior to this industry in corporate management, then law enforcement, and now high end audio/video and integration, been able to more comfortably, more accurately recommend anyone than Ms. Wendy Gesler.

She will not let you down, and will return far more than you invest.

Sincerely,

Brian S. Collins, CCPII
Project Manager
