

To Whom It May Concern,

I have known Wendy Gesler for approximately three years. In my capacity as part owner and Operations Manager of a high-end audio, video, home theater and systems integration company, I have worked closely with her in providing AMX automation and control solutions and systems integration. She has also provided valuable guidance in regard to LAN and WAN networking solutions.

Wendy and I have worked together on small projects to very large, complex residential projects. We have worked closely on projects from the development of budgets to successful completion and final software testing. I have four years of prior technical and supervisory experience with AMX programmers. Wendy Gesler exceeds every programmer I have worked with in both technical understanding of audio and video systems and programming expertise. She has the highest level of work ethic and integrity.

I recommend Wendy Gesler without reservation as an AMX programmer, networking consultant and systems integrator.

Sincerely,

Dwight Hapeman
